

You said, we did: Your 2024 NHS Staff Survey feedback

“ I want to be told about the difference that my feedback makes ”

We created a results summary and action plan template to help team leaders keep you updated on the changes sparked by your feedback.

Your team's action plan is used to track the progress of improvements and celebrate team success.

← We also created a Trust summary and action plan which you can find on the NHS Staff Survey intranet page.

We will share 'you said, we did together' updates with you throughout the year and check in with you every quarter using the People Pulse survey to measure the success of improvements.

The [directorate culture plan](#) framework has been designed to support and empower directorate leaders to build a positive culture by identifying improvements and goals.
