

You said, we did: Your 2024 NHS Staff Survey feedback

“ I want to work in an effective team with strong working relationships ”

We have created a new hub on the intranet for all staff to access opportunities, information and resources for team development.

Search '[building effective teams](#)' on the intranet to find them.

We have partnered with TED (Team Engagement and Development) to help teams take control of their own engagement.

TED supports structured team conversations about the issues that are important to you and provides a toolkit of resources to help team leaders plan and work to improve these areas. Find out more on our [intranet pages](#).

We have developed '**Navigating Change**' eLearning to support you to understand emotional and behavioural reactions to change and feel more confident supporting yourself and others through periods of change. Find out more on our [intranet pages](#).
