Help us raise  
**£25,000**  
for Poole Hospital this Christmas

Poole  
Hospital  
**Elf**  
Service

**Christmas list**

**V-Create for Neonatal Baby Unit**  
A secure video messaging service that lets hospital staff record and send secure video updates to parents when they're unable to be by their baby.

**Upgrade to RACE unit patient area**  
The RACE unit assesses and treats older patients with worrying illnesses. This 'one stop service' ensures patients get an early diagnosis but can often mean a long wait. Upgrading this area would help keep patients calm and reassured and provide a welcome distraction whilst they await results.

**Diabetic Children's Service**  
Receiving a diagnosis of Type 1 diabetes can be a daunting time for families. Starter packs which include weighing scales, carb counting book and finger wipes for testing blood sugars, will take some of the worry away as families adjust to managing life with diabetes.

**Vein finder for Clinical Management Team**  
Cannulating and taking blood samples can be challenging, especially in the dark! The infrared vein finder will ensure patients admitted at night are more comfortable during this procedure.

**Body composition analyser**  
The analyser will help us to calculate patient's nutritional status which is often affected by illnesses including cancer. It will allow us to tailor our nutritional advice more individually which will benefit patients and improve their response to lifesaving treatments.

**Eagle Boards for Radiotherapy**  
These boards will help support patients receiving specialist radiotherapy treatment for lung cancer, ensuring the treatment is delivered accurately and effectively and avoiding the need for invasive surgery.

**Christmas presents on the wards**  
We want everyone to experience the magic of Christmas during their stay with us. Your donations will ensure patients, young and old will receive a small gift on Christmas day.
