

INTRODUCING THE CHANGOVER TO THE NEW INNOVATIVE P50 FIRE EXTINGUISHERS!

Multi-risk Capabilities

The foam P50 fire extinguisher is certified for use on class A (flammable solids), class B (flammable liquids), and electrical fires up to 1000 volts.

Inventory Reduction

Because of the P50's multi-risk capabilities, one foam P50 fire extinguisher replaces the two traditional steel extinguishers that you had previously.

Increased Fire Safety

In comparison to a traditional steel fire extinguisher, the P50 fire extinguisher is almost three times more effective at eliminating a fire!

Reduced Carbon Footprint

The P50 is built using low energy, clean manufacturing processes with a zero-waste policy. They are made from recyclable materials and the elimination of external service contractors attending site further reduces your carbon emissions.
