[How to take a picture](#)

Complete the form. Required fields will be indicated if missing.

Add an image by clicking 'choose file', select the image. The image will appear as a thumbnail next to the button.

Choose the site from which the image was taken, i.e. your left arm or your back

If you need to add more images, you can add up to 5 by clicking 'Add another image'.

For guidance on the types of image, size, quality, and how to take a picture – click on the link 'How to take a picture'

Click  when ready to send us your image/s.

A notification will show whether you were successful.

Images successfully received

You have successfully submitted 1 images to the Dermatology department.
These images will be reviewed during your consultation.

Thankyou for using this service

If only some of your images were loaded, this will be orange – and will show you how many images succeeded. If all of your images were successfully sent the notification will be green.

FAQ

How do I know my images and personal details are safe?

We use public key encryption to secure your information. This is secured in transit (via HTTPS/TLS) and whilst stored on the server. The information can only be decrypted once inside the Trust. This is safer than sending your images via email. It also allows us to track receipt of your images.

If I have any problems, can I get any help?

The administration team of the department can assist you.

What images can I send?

The system supports JPG, GIF, BMP, and PNG
